

numerically integrated area under Po-214-peaks, from $(peak - 3\sigma_{fit})$ to $(peak + 3\sigma_{fit})$

$a = (36186.08 \pm 899.16)$, $b = (0.43 \pm 0.01)$, $\langle R \rangle = (3.73 \pm 0.05)$, $\chi^2/dof = 211.1 / 10.0 = 21.1$
